

New GYE Whatsapp Support Group

Posted by the.guard - 28 Apr 2021 09:44

---

Wouldn't it be great to have a Whatsapp group where you could reach out for help 24 hours a day, or post chizuk - just like on the GYE forums and chat rooms?

We just launched a GYE Whatsapp group where you can:

- Connect with others and get out of isolation,
- Have some accountability with your fellow members
- Reach out for help in a "weak moment" and get instant chizuk
- Share inspiring memes, short video clips and articles.
- Give chizuk to others

We hope to have be"n a few moderators as well, who can help with chizuk and support.

**DISCLAIMER:** Whatsapp is less anonymous than the GYE forum and chat-rooms. People can see your phone number, and often your name and picture can come up as well. **To help protect everyone, we will only allow verified GYE members to join.**

If you're ready to take your recovery up a notch and join, send an email to [gyewhatsapp@gmail.com](mailto:gyewhatsapp@gmail.com) with the word "Join" in the subject with your phone number (with the country code) and **your GYE username** in the body of the email.

[See here](#) for terms and conditions.

I have an idea unrelated to this. Many people probably don't want to receive the daily chizuk via WhatsApp due to privacy concerns and they can't open the emails (like me). Is it possible to start posting the daily videos and inspiration on a WhatsApp status?

The daily boosts are sent through a business account so as far as I understand only the one running the account sees your nnumber.

Did you mean privacy concerns from your end?

Status is like 30 seconds no? so for a 5 min video we would have to cut into 6 pieces?

I actually did not know that with a business account nobody can see the number. But what a status accomplishes is that you can mute it so nobody can see that you are following it. On the other hand a group shows up in conversations.

I believe so.

For me the risks and pitfalls of having whatsapp far outweighs any benefits of a support group or daily boost.

Grant, what is wrong with the email?

Would it help if the boosts are audio files directly attached to the email? How about having the boosts formatted to work with podcast apps, and have it added to YidPod so people can subscribe without having the issue of being able to add explicit podcasts.

Just sharing some ideas.

Is there an easy way to do this?

ffmpeg is a free open source command line utility which can be programmed to do this easily. Handbrake is a GUI program which you can also split video files based on a criteria. There is also a bunch of programs which can do this as well.

I can't open the files such as the video because of a whitelisted browser.

Do you have google drive and do those links work?

Would love to see this on YidPod - would also cater to a greater audience without compromising privacy

I do have it but so far hasn't worked for me.

I think I know what the issue is.

Android tries to open supported links using the apps that are registered to handle those links.

Due to the fact that the email newsletter gets sent out using a mass mailer. The link gets formatted with a tracking link that reroutes to Google Drive.

For example (from todays broadcast) instead of:

[drive.google.com/file/d/1oVvrj-3OwfTwuGnZmv25tXxtFLvbFeNZ/view](https://drive.google.com/file/d/1oVvrj-3OwfTwuGnZmv25tXxtFLvbFeNZ/view)

the link is:

[r20.rs6.net/tn.jsp?f=001o7N0HhANjfJilEWA\\_ku8DtjAwyA4fhytRCwf3VjynC2QJpSCKjk0IEldz6\\_ytmAVZLLW8l\\_tYTGL0oRMjmGgu9SuPoa7kF7TI4zfwgwkjD4a4QnDisnli8Hkejc6B0bKJvzCmza5e6dMzPe3rsOptK9WJ00ZQnrAyF0LrKPMHJ2\\_oa97qz-K2tHIGsy41kTfJ033\\_Oc6cJ0ewvolHi5w\\_fsTQGwxDZf4Rmu3IPHAruA=&c=CbKSzIPkTrbiytEb8bYP8B2ikeoOrU2vdL0Z-4Oefx7GoCuD9d-NvA==&ch=16mjxiToe5\\_h9Zhx1vMMwsKVtYMHPH7DIgSdBXsGDp\\_FLSp8h9waCg==](https://r20.rs6.net/tn.jsp?f=001o7N0HhANjfJilEWA_ku8DtjAwyA4fhytRCwf3VjynC2QJpSCKjk0IEldz6_ytmAVZLLW8l_tYTGL0oRMjmGgu9SuPoa7kF7TI4zfwgwkjD4a4QnDisnli8Hkejc6B0bKJvzCmza5e6dMzPe3rsOptK9WJ00ZQnrAyF0LrKPMHJ2_oa97qz-K2tHIGsy41kTfJ033_Oc6cJ0ewvolHi5w_fsTQGwxDZf4Rmu3IPHAruA=&c=CbKSzIPkTrbiytEb8bYP8B2ikeoOrU2vdL0Z-4Oefx7GoCuD9d-NvA==&ch=16mjxiToe5_h9Zhx1vMMwsKVtYMHPH7DIgSdBXsGDp_FLSp8h9waCg==)

Either GYE can edit that and put in the full google drive link, or you can use an app called bURLy: [apkpure.com/burly-browser-chooser/com.shadowburst.burly](https://apkpure.com/burly-browser-chooser/com.shadowburst.burly)

Which can process the redirect for you.

Hatzlacha

Would love to see this on YidPod - would also cater to a greater audience without compromising privacy

The first step is getting the site podcast friendly, so that iTunes or other Podcasting software can access it.

Here is a tutorial explaining the process: [itconnect.uw.edu/learn/workshops/online-tutorials/web-publishing/podcastingvroadcasting-distributing-your-audio-and-video-files-via-the-web-part-i/](https://itconnect.uw.edu/learn/workshops/online-tutorials/web-publishing/podcastingvroadcasting-distributing-your-audio-and-video-files-via-the-web-part-i/)
